

Two-tone
Decoding

Chunk pointers,
Erased indices

Construct
erasure-mapping chunks
to map erasures
and parities

$\Theta(e)$ ALU

Substitute
survived data chunks into
erasure-mapping chunks

$\Theta((k_e + ek_e)L)$ MEM,
 $\Theta(k_e eL)$ XOR

Execute
two-tone elimination
and substitute codes into
erasure-mapping chunks

$\Theta((ek_e)L)$ MEM,
 $\Theta((e-1)k_eL)$ XOR

End

$\Theta((k_e + ek)L)$ MEM,
 $\Theta((ek - k_e)L)$ XOR
